

Spring 2012

Reading Course

Hamilton-Jacobi Solvers and their Applications

Instructor: Maria Cameron
E-mail: cameron@math.umd.edu
Office: MATH 4105

Credits: 1, 2, or 3
Course: AMSC 698A
Section: 0802

Methods:

- Fast-Marching
- Ordered Upwind
- Fast Sweeping

Applications:

- computational geometry
- rare events
- optimal control
